

Forest Lighter Announces Result of Planting Trees in the Second Quarter of 2021

A part of the company's resources strategy since 2016 is to recover protected areas destroyed by human logging, flooding, thunder storms and tree beetles. Planting of trees was organised with help of a non-profit organisation *Make a Home* and government institution *TANAP* at *Tri Studnický*, High Tatras in Slovakia. Google location 4XQ8+XH Vysoké Tatry, Slovakia. "Even through these challenging times, Forest Lighter managed to keep its commitment and plant trees during the pandemic" Director Peter Hudec concluded. „Our strategy positions Forest Lighter to return something back to the nature“.

The following chart shows how many trees have been planted each year:

Forest Lighter planted 30 trees in 2017 („*Bielovodska Dolina*“ 6482+3F), 36 trees in 2018 („*Starý Smokovec*“ 49°08'28"N 20°13'16"E), 46 trees in 2019 („*Topolčianky*“ 48°25'22"N 18°24'33"E), 80 trees in 2020 (*Tri Studnický*) and 267 trees in 2021, which makes 459 trees altogether. Location for planting trees is always confirmed by *TANAP* a month in advance.

Forest Lighter's message to business partners and customers is to plant more trees and lower carbon emissions. Places where the previous planting happened will be regularly monitored and knowledge used for the next phases of planting. Over the next five years, the company expects to increase its support of £20 000 in planting trees in the EU and worldwide.
